Candidate AI Guidelines

We are thrilled you are considering Wiz as the next step in your career! These guidelines are specifically created to help you navigate through utilizing AI tools during your interview process with us.

We would love to caveat that while it is generally fine for you to adopt the use of any AI tools to enhance your application, we encourage you to use them thoughtfully and with good judgment. We recommend that you focus on using AI to build and strengthen your profile during the job application process, and also prepare for live interviews only. Likewise, you should take this opportunity to showcase your exceptional talents and amazing technical skillsets to your best abilities truthfully.

What constitutes as third party "AI tools" in our interview process? This includes, but is not limited to:

- Chatbots
- Notetaking and transcriptions
- Research
- Content creation
- Coding and automation

Some examples of supportive vs. not allowed usage:

Scenario	Notes
Using AI tools to present personal and work experience **Guidance: Supportive**	You can use prompts to better articulate and refine your individual profile and career experiences during job application (resume, cover letter, application questions).
Using AI tools for interview preparation **Guidance: Supportive**	You can take advantage of AI tools for preparation, not limited to, researching Wiz, practicing for interviews (questions and answers) and wherever relevant.
Using AI tools during live interviews **Guidance: Not allowed**	Enabling any notetaking tool(s) that summarizes and organizes content, especially during live interviews, which may contain sensitive information being communicated is strictly prohibited. Our interviewers are highly encouraged to disable the AI Companion function on Zoom settings during interviews, unless told otherwise.
Using AI tools for take-home and online assessments **Guidance: Discretionary**	Unless permitted or clearly stated, you are not allowed to use AI during live interviews or written assessments in order for us to assess you fairly across our candidate pool.

In the event our hiring team notices any unauthorized usage of AI or third-party applications during the interview process, Wiz may determine that your candidacy is no longer valid. If you are unsure whether you are permitted to use any AI tool, please reach out to your Talent Partner for further direction.

We hope this guide comes in handy and we look forward to speaking with you!
